E Commerce store

- Create an online store where you can buy video games and fan gear.

- Create a website that includes pictures and names of some video games and fan gear.

- Managing inventory and products in a store is a pain if you have to update code every time. You can use tools like content management systems to dynamically add products.
  Integrate a CMS that allows you to manage available products.

- In order to purchase a product we will need to provide a way for the customer to pay for it. This includes adding the product to a cart and checkout process.
  Add a cart and payment provider that allows someone to purchase a game.
